

RO SIN ABSOLUTE

CANNABIS OIL REDEFINED
ELEVATE YOUR STANDARDS

WHAT IS ROSIN ABSOLUTE?

Rosin Absolute is a BRAND NEW cultivar-specific, full spectrum extract made from an extraction technology called Terpenoid Flavonoid Extraction (TFE) not utilized in the cannabis industry... until now. Rosin Absolute is the purest cannabis extract available on the market.

WHAT IS TERPENOID FLAVINOID EXTRACTION (TFE)?

Terpenoid Flavonoid Extraction (TFE) marks a transformative advancement in cannabis extracts. Operating at the delicate intersection of low temperature and minimal pressure, TFE meticulously safeguards the full spectrum of cannabinoids, terpenes, and flavonoids, radically reducing the oxidation that's typical in other methods. The result is an unrivaled extract that captures the essence of the flower in its purest form, minus the plant matter.

WHY IS THERE COLOR VARIATION BETWEEN CULTIVARS?

Just like beer and tequila come in a variety of colors, so too should cannabis oil. Rosin Absolute oils exhibit a wide array of colors because our extraction process uniquely preserves the essential terpenes, flavonoids, and other beneficial compounds. This leads to a cannabis oil that truly mirrors the original flower in color, flavor, and effect, each as distinct and exceptional as the cultivar they derive from.

RO SIN ABSOLUTE vs. DISTILLATE

RO SIN ABSOLUTE

PRESERVES TERPENES
FREE FROM TOXIC RESIDUES
FULL SPECTRUM
HEAT-FREE EXTRACTION
NO POST PROCESSING

DISTILLATE

REINTRODUCES TERPENES
RESIDUAL TOXIC CHEMICALS
SIMPLE FORMULATION
DEGRADATION FROM HEAT
POST PROCESSING REQUIRED
